ELSEVIER

Int. J. Production Economics 38 (1995) 301–302

international journal of
production
economics

Contents Volume 38

Vol. 38, No. 1

Introduction – Collaborative integration
M.S. Fox, S.Y. Nof and A.B. Whinston 1
Planning and control of concurrent engineering projects
A. Rolstadas 3
Systematic integration of design-for-recycling into product design
A. Kriwet, E. Zussman and G. Seliger 15
Tool integration for collaborative design of manufacturing cells
J.P. Witzerman and S.Y. Nof 23
Document-centered information systems to support reactive problem-solving in manufacturing
A. Balakrishnan, R. Kalakota, P.S. Ow and A.B. Whinston 31
Integration of benchmarking and benchmarking of integration
M. Lucertini, F. Nicolò and D. Telmon 59
Neural network-based agents for integrating information for production systems
R. Eberts and S. Habibi 73
Integrated coordination in cooperative design
M. Klein 85

Vol. 38, Nos. 2/3

On the utilization of a split production system with inter-stage inspection
M.N. Gopalan and U.D. Kumar 107
An economic approach to job shop performance analysis
S.T. (Van) Enns 117
Combined heuristics for bi-level group scheduling problems
R. Logendran, L. Mai and D. Talkington 133
Telecommunication in Greece: A study of production structure and natural monopoly issue
T. Christodoulopoulos 147
Manufacturing cost estimation for PCB assembly: An activity-based approach
N.S. Ong 159
Layout design in group technology manufacturing
M.M.D. Hassan 173
Strategic planning in manufacturing systems – AHP application to an equipment replacement decision
H. Oeltjenbruns, W.J. Kolarik and R. Schnadt-Kirschner 189
An instrument for quality performance measurement
A. De Toni, G. Nassimbeni and S. Tonchia 199
The impact of multiple stocking points on system profitability
R.D. Meller 209
Ambiguity in multicriteria quality decisions
I. Gutiérrez and S. Carmona 215
Distribution planning for a divergent *N*-echelon network without intermediate stocks under service restrictions
J.H.C.M. Verrijdt and A.G. de Kok 225

0925-5273/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

Optimal pricing and product-planning for new multiattribute products based on conjoint analysis
D. Yoo and H. Ohta 245
Implementing flexible automation: A multiple criteria decision making approach
V. Lotfi 255
A mathematical programming approach towards optimized master production scheduling
S.C.K. Chu 269
An options view of investments in expansion flexible manufacturing systems
R.L. Kumar 281
Addendum
S.K. Goyal 293
